DESCRIPTION

Hiperco® 50A, an iron-cobalt vanadium soft magnetic alloy provides superior magnetic properties when compared to other soft magnetic alloys. Hiperco 50A key properties include the highest magnetic saturation of 24 kilogauss while sustaining low core loss. Often this alloy can be found in motors and generators to improve the motor's power density and efficiency while providing a reduction of motor size.

APPLICATIONS

Motors and generators; Actuators; Specialty transformers; Electromagnetic pole pieces.
